PHIL LEVIN
PRESIDENT
LEVIN STONE CO INC
PO BOX 95
ASH FORK AZ 86320

Dear Mr. Levin:

On April 2, 2002, a surface compliance inspection was conducted at the site of your notice serialized UTU-078278, located in T. 18 S., R. 13 W., Sections 3 and 4.

The inspection revealed that the following items need to be done to complete reclamation of the site:

1. All pallets of stone, empty pallets and other debris must be removed from the staging area,
2. The staging area, and about 1500 feet of road leading from the poleline road to the recontoured pit must be ripped and,
3. The entire disturbance must have seed applied to it.

Since you have indicated to Sheri Wysong of this office that you plan to return to this area to purchase and mine more stone, we realize that you may wish to continue use of the staging area. If so, since you are no longer conducting operations under the 43 CFR 3809 regulations, but instead under the 43 CFR 3600 regulations, your use of the staging area must be authorized by a Land Use Permit (LUP). Enclosed are two copies of a Land Use Application. Please complete both copies and submit them to this office as soon as possible. If you wish for us to prepare a map that determines the exact location and size of the staging area as it now exists for the purposes of determining the boundaries of the area authorized for use under the LUP, please contact us. Otherwise, you must submit your own map with the applications.

If you have any questions, please contact Sheri Wysong at (435) 743-3124.

Sincerely,

Rex Rowley
Field Office Manager
